

## Java

```
class Solution {  
    public long splitArray(int[] nums) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {number[]} nums  
 * @return {number}  
 */  
var splitArray = function(nums) {  
  
};
```

---

## TypeScript

```
function splitArray(nums: number[]): number {  
  
};
```

---

## C++

```
class Solution {  
public:
```

```
    long long splitArray(vector<int>& nums) {  
    }  
};  
-----
```

## C#

```
public class Solution {  
    public long SplitArray(int[] nums) {  
    }  
}
```

## Kotlin

```
class Solution {  
    fun splitArray(nums: IntArray): Long {  
    }  
}
```

## Go

```
func splitArray(nums []int) int64 {  
  
}
```
